## Sleep-Related Infant Deaths in Out-Wayne County (2010-2017)

Between 2010 and 2017, there were 102 sleep-related infant deaths in Out-Wayne County, which is a rate of 0.9 deaths per 1,000 live births. Sleep-related infant death is a leading cause of death among infants less than 1 year of age. Sleep-related infant deaths are those where the sleep environment was likely to have contributed to the death.<sup>1</sup> In Michigan, comprehensive information about the circumstances associated with sleep-related infant deaths has been tracked through the Centers for Disease Control and Prevention-funded Sudden Unexpected Infant Death (SUID) Case Registry since 2010.

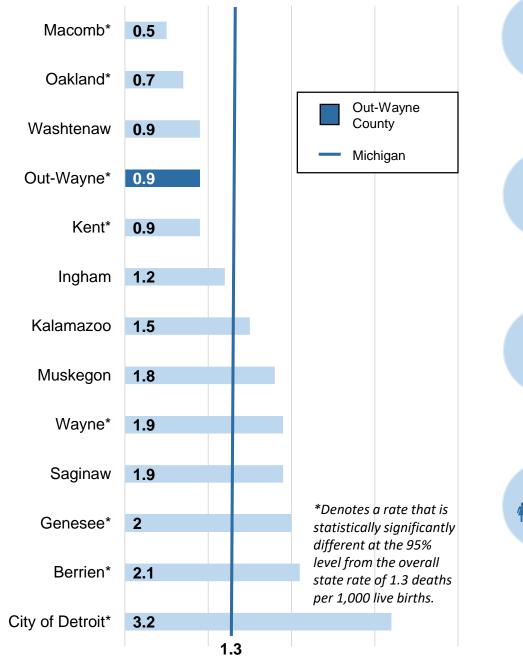

## To reduce the risk of sleep-related infant death, the American Academy of Pediatrics (AAP) recommends that:

| -  |  | -  | <u> </u>   |
|--|--|--|--|
| Infants be placed to<br>sleep on their back<br>at nap time and<br>bedtime<br>Infants slee<br>safety-appro<br>bassinet, or<br>crib with a firm<br>and tight-fitti | ed crib,<br>ortable<br>mattress<br>a surface separate from<br>adults, animals, and other<br>children that is free of | Infants be<br>exclusively breastfed<br>or fed with<br>expressed milk | Smoke exposure<br>is avoided during<br>pregnancy and in the<br>infant's environment after<br>birth |

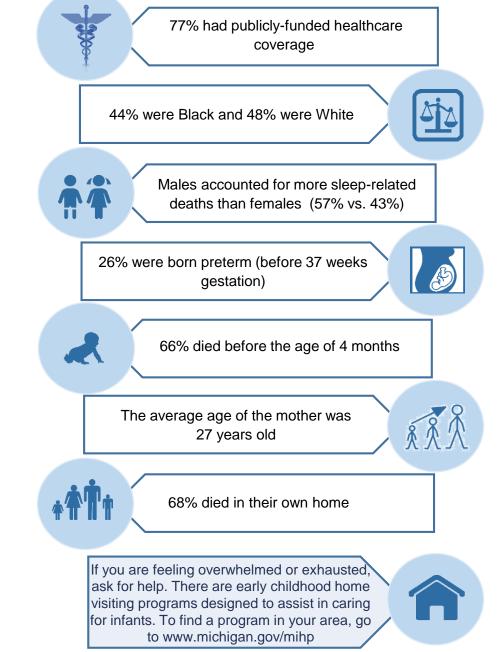

A safe sleep environment can reduce the risk of all sleep-related infant deaths. In Out-Wayne County...

| 56% of infants found<br>unresponsive were not<br>on their backs   | 83% of sleep-related deaths<br>occurred in an unsafe sleep<br>location  | 67% of sleep-related deaths<br>involved an infant sharing a<br>sleep surface  | 39% of infants who died of<br>sleep-related causes had<br>ever been breastfed  | 61% of infants who died of<br>sleep-related causes had a<br>mother who smoked during  |
|---|---|---|--|---|
|   |   |   | ė  | pregnancy   |
| When a baby is on his back, the<br>air tube (trachea) is on top of the<br>food tube (esophagus). If a baby<br>spits up while on his back, the<br>food/fluid run back into the<br>stomach and not to the lungs.<br>When a baby is on his stomach,<br>the esophagus is on top of the<br>trachea and any food/fluid that is<br>spit up can more easily pool at the<br>opening of the trachea, making it<br>possible for the baby to choke. | Sitting devices, such as car<br>seats, strollers, swings, infant<br>carriers, and infant slings, are<br>not recommended for routine<br>sleep in the hospital or at home.<br>A crib, bassinet or portable crib<br>was not present in the home in<br>18% of deaths. | The majority (54%) of sleep-<br>related deaths occurred in an<br>adult bed. Of the deaths where<br>objects were known to be in the<br>sleeping environment, the<br>majority involved two or more<br>objects. Of these, the most<br>common objects were adults<br>and/or other children, mattresses,<br>thin blankets/flat sheets,<br>comforters, and pillows. | In comparison, 78% of all mothers<br>in Out-Wayne County planned to<br>or initiated breastfeeding. <sup>2</sup> The<br>protective effect of breastfeeding<br>increases with exclusivity.<br>However, any breastfeeding has<br>been shown to be more protective<br>against deaths from sleep-related<br>causes than no breastfeeding.<br>Consider offering a pacifier at nap<br>time and bedtime once<br>breastfeeding is firmly established. | In comparison, 15% of all<br>mothers in Out-Wayne County<br>smoked during prenancy. <sup>2</sup> Bed<br>sharing with a current smoker,<br>or with a mother who smoked<br>during pregnancy, has been<br>shown to substantially increase<br>the risk of death due to sleep- |

## Rate of Sleep-Related Infant Death per 1,000 Live Births by Geographic Location

## Of the infants who died of sleep-related causes in Out-Wayne County...

<sup>1</sup>Sleep-related infant deaths are defined as deaths to Michigan resident infants less than 1 year of age that occur suddenly and unexpectedly and include sudden infant death syndrome (SIDS), undetermined/sudden unexplained infant death (SUID), suffocation/positional asphyxia, and other causes where the sleep environment was likely to have contributed to the death. Death data are by county of residence from CDC SUID Case Registry, Michigan Public Health Institute, 2019. Birth data are from Michigan Resident Birth Files, Division for Vital Records and Health Statistics, Michigan Department of Health and Human Services; retrieved at http://www.mdch.state.mi.us/osr/chi/births14/frameBxChar.html
